

I cannot install Respondus Lockdown Browser or other programs on my Windows 10 S computer

Problem

Cannot install Respondus Lockdown Browser or other programs on Windows 10 S computer that are downloaded from the internet.

Solution

Windows 10 S is a lightweight, economical version of Windows that only allows apps from the Microsoft Store to be installed. Students may be able to download Windows 10 Education for free from [Kivuto Solutions](#) as a workaround. We highly recommend having the University Bookstore or other paid service assist in any Operating System installation.

Alternatively, we have Respondus Lockdown Browser available on all lab and public computers.
