

# Printing, Faxing and Scanning

Salisbury University offers many options for printing on campus for faculty, staff and students.

Information Technology encourages everyone to do your part to reduce printing and paper waste. All users are given 300 pages per week but encouraged to use as necessary to reduce waste.

In an effort to limit contact, stapler and hole punch devices will not be available at print stations on campus. Also please be aware that there may be limitations on building capacity in print areas, this may limit your ability to print in a expedited manner. If you wish to you may bring a [wired personal printer](#) to use when needed.
